Meybod Plast Fallah Company

Meybodplast Fallah Company

Our purpose is to identify the demands and best solutions to increase the quality and provide diverse and affordable products to customers. Based on customers' needs and orders, this company's production line produces various products with different dimensions and widths.

Different kinds of single-layer and three-layer nylons up to 6 meters wide and 15 to 270 microns in thickness are produced in this company.

Single-layer and three-layer films are used in packaging, shearing, pallet cover, construction, agriculture, and unique fruit and vegetable bags.

Three-layer films are used to cover greenhouses, insulate swimming pool basins, save, etc.

Quality guarantee:

Written guarantee of production quality with approved samples

Variety of products:

Producing more than 200 types of products

Competitive price:

Direct purchase from the factory at a price below the intermediaries

Nationwide Shipping:

Sending cargo to the desired location of the customer is possible.

Production with export quality:

The ability to produce export products for world competitions

Products:

Production and distribution of nylon (polyethylene), including:

- Nylon shearing production
- Nylon cover pallets production (Pallet packaging)
- Greenhouse nylon (with UV) production
- Stretch film production
- Agricultural nylons production
- Production of wide nylons
- Production of unique fruit and vegetable bags

Wide Agricultural and greenhouse nylon:

Width: 20 cm to 12 meters

Thickness: Can be ordered

1. Wide nylons used in agricultural lands, greenhouse covers, stream basins and top
2. Special bags for fruits and vegetables

Based on the customer's order, the following compounds can be added to nylon:

1. (ANTI UV): ANTI-ULTRAVIOLET RAYS OF THE SUN, TO INCREASE RESISTANCE AND DURABILITY OF NYLON AGAINST THE SUN
2. (IR ABSORBER): SUN INFRARED RAYS ABSORBER, TO PREVENT TEMPERATURE DROP OF THE GREENHOUSE DURING THE NIGHT
3. (ANTI-STATIC): ANTI-STATIC ELECTRICITY TO REDUCE DUST ABSORPTION ON NYLON
4. (ANTI FOG): ANTI-STEAM AND FOG, TO PREVENT WATER VAPOR FORMATION ON NYLON SURFACE, TO INCREASE PRODUCTS' QUALITY AND QUANTITY, AND TO PREVENT MICROORGANISMS' GROWTH

Shearing nylon (Packaging nylon):

Width: from 15 cm to 250 cm

Thickness: from 15 to 250 microns

Shearing nylon for packing industrial products (tile factories), food products, etc.

Based on the customer's order, the following compounds can be added to nylon:

1. (ANTI UV): ANTI-ULTRAVIOLET RAYS OF THE SUN, TO INCREASE RESISTANCE AND DURABILITY OF NYLON AGAINST THE SUN
2. (IR ABSORBER): SUN INFRARED RAYS ABSORBER, TO PREVENT TEMPERATURE DROP OF THE GREENHOUSE DURING THE NIGHT
3. (ANTI-STATIC): ANTI-STATIC ELECTRICITY TO REDUCE DUST ABSORPTION ON NYLON
4. (ANTI FOG): ANTI-STEAM AND FOG, TO PREVENT WATER VAPOR FORMATION ON NYLON SURFACE, TO INCREASE PRODUCTS' QUALITY AND QUANTITY, AND TO PREVENT MICROORGANISMS' GROWTH

Pallet cover:

Width: 2 to 6 meters in requested length

Thickness: from 70 to 280 microns

Wide four-layer nylon (with cassette) sewn for packing pallets of industrial products (pallets of tiles, petrochemicals, AAC blocks, and food products)

Based on the customer's order, the following compounds can be added to nylon:

1. (ANTI UV): ANTI-ULTRAVIOLET RAYS OF THE SUN, TO INCREASE RESISTANCE AND DURABILITY OF NYLON AGAINST THE SUN
2. (IR ABSORBER): SUN INFRARED RAYS ABSORBER, TO PREVENT TEMPERATURE DROP OF THE GREENHOUSE DURING THE NIGHT
3. (ANTI-STATIC): ANTI-STATIC ELECTRICITY TO REDUCE DUST ABSORPTION ON NYLON
4. COLOR CODE REQUEST

Stretch film (five layers)

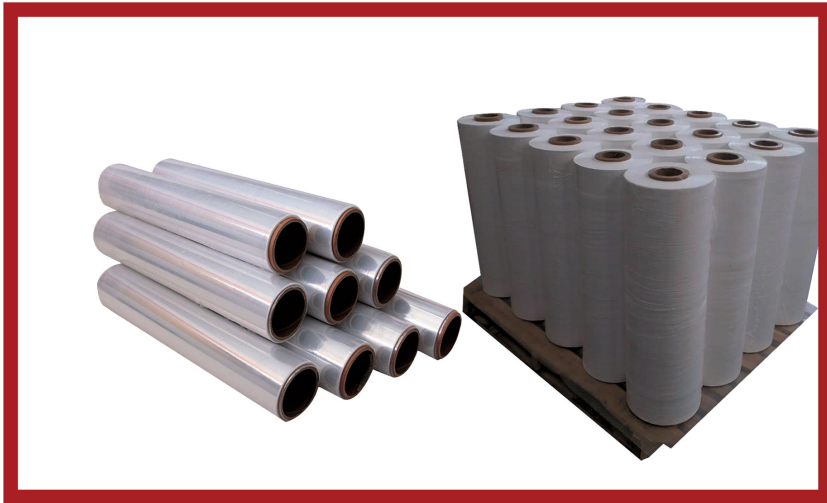

Width: 10 to 150 centimeter

length: requested length

Thickness: from 10 to 50 microns

Stickiness: from 1 to 7 percent

Stretch film is a polymer product for packaging and securing products, the five layers of this product cause high elasticity up to four times the actual length and good Stickiness for use packaging food, pallets, bed linen, furniture, stores, etc.

Based on the customer's order, the following compounds can be added to Stretch:

1. (ANTI UV): TO INCREASE RESISTANCE TO THE SUN
2. TYPES OF MASTERBATCHES, TYPES OF COLORS AND ADDITIVES
